

Council of Alberta University Students
Education Funding Policy
Policy #02-03

WHEREAS the provincial government chronically underfunds education in this province; and

WHEREAS classrooms sizes are increasing to the point where learning is being severely compromised; and

WHEREAS the quality of education students are receiving is decreasing due to a lack of resources; and

WHEREAS increasing tuition fees are currently turning qualified students away from the Alberta universities; and

WHEREAS increased government funding for education would alleviate these problems and would ensure an accessible, high quality institution; and

WHEREAS the inequity between institutions is compromising the quality of education offered in Alberta's universities to students.

BE IT RESOLVED THAT the Council of Alberta University Students advocate to the provincial government for increased funding for post-secondary education provided to institutions on an equitable basis.

BE IT FURTHER RESOLVED THAT the Council of Alberta University Students actively engage in coalition building with various organizations to provide a united voice in pushing for funding.
